Re: ZON 2023-02

Dear Commissioners:

ZON 2023-02 demonstrates that under the current Klickitat County Comprehensive Plan rezones are inconsistent (or cannot be made to be consistent) with current goals and objectives of the Comprehensive Plan.

As currently administered, rezone applications fail to include development plans, even at the conceptual level. As a consequence, environmental and societal impacts cannot be sufficiently considered and addressed.

Some members of the Trout Lake Community Council attended (via video conferencing) the Klickitat County Planning Commission Hearing on this rezone. Nothing was presented at the hearing that addressed the necessity of ZON 2023-02.

Therefore, we still feel it is essential that a moratorium be put in place on all rezone proposals, including ZON 2023-02, until such time that the Comprehensive Plan and subarea plans are reviewed and updated.

Respectfully,

DAINA L. BAMBE  
Chair, Trout Lake Community Council
